B.E. (Computer Engineering)
CYBER SECURITY AND DIGITAL FORENSICS
(2019 Pattern) (Semester - VII) (410244 C) (Elective - III)

Time : 2½ Hours]

[Max. Marks : 70

Instructions to the candidates:

- 1) *Answer Q.1 or Q.2, Q.3 or Q.4, Q.5 or Q.6, Q.7 or Q.8.*
- 2) *Neat diagrams must be drawn wherever necessary.*
- 3) *Figures to the right side indicate full marks.*
- 4) *Assume suitable data if necessary.*

- Q1)** a) What are the typical services offered by computer forensics professionals? (explain any two) [9]
- b) What specific technologies are utilized in the field of business computer forensics? (Describe any two) [9]

OR

- Q2)** a) How does computer forensics technology vary cross different sectors like military law enforcement & business? [9]
- b) What are the key components of a data recovery solutions in computer forensics? Explain in detail. [9]

OR

- Q4)** a) What is the volatile evidence in the context of computer forensics, and why is it important to collect in quickly? [8]
- b) What are the hypical steps involve in the collection of digital evidence?[9]

- Q5)** a) What are some common data hiding techniques? Explain any one in detail? [8]
- b) What is the honey net project, and how does it contribute to network forensics? [9]

OR

P.T.O.

- Q6)** a) What precautions should investigators take to prevent data alteration or loss during the seicure process? Explain any one in detail? [8]
b) What are the challenges and best practices associated with performing remove acqisitions? [9]

- Q7)** a) Whar are the common examples of email crime & violations that may necessitate investigation? Explain any one in detail? [9]
b) Explain any software tool using in computer forensics investigation and its respective purpose? [9]

OR

Q8) Write short note (any two) [18]

- a) Computer forensics hardware tools
- b) Validating & testing forensics software
- c) e-mail investigation
